10th Anniversary for RTS in Brazil

Sao Paulo, 6th July 2020

RTS has now been operating in Brazil for ten years. We first arrived in Brazil in 2010, establishing an office in the city of Santo André, in São Paulo Province. Until 2015, the operation was run by four employees. That same year, the office in Rio de Janeiro opened, the first step in RTS' great expansion there since.

The RTS Group's workforce in Brazil is currently formed by more than 50 professionals, distributed almost throughout the country, with 5 own branches (São Paulo, Rio de Janeiro, Porto Alegre, Belo Horizonte and Brasília).

We are currently one of the companies with the highest qualifications and greatest amounts of experience in the Brazilian market, processing a great volume of claims.

Apart from RTS, which provides its industrial, commercial and specialised risk services, and from RETSIS (TPA and small claims), IST (cause investigations) and RTS LCC (large and complex claims), there are other Group companies also present in Brazilian insurance market, reinforcing our services portfolio.

RETSIS specialises in the adjustment of frequent claims, comprehensive claims processing and documental management. In Spain, it is the leader in comprehensive claims management and in Brazil, it also provides services, brand development is notable and we are represented throughout the country.

Our team of forensic engineers (IST), with expertise in determining the root causes of claims, losses or breakdowns and specialised risk consultancy, also operates in Brazil, as well as in Spain, Colombia, Mexico and Chile.

We would like to thank all our clients and the Brazilian insurance market for the trust deposited in us over all these years. We continue to progress together to continue offering the best service possible.

About RTS International Loss Adjusters

RTS is an international Corporate Group established in 1989, with its own offices in Spain, Latin America and Portugal. Since its beginnings, RTS' business has comprised the analysis and/or adjustment of industrial risks, damage and technical areas of all kinds.
