

RTS International Loss Adjusters will be participating in the 1st Meeting of the Partners of the MWCC Association

Madrid, October 27th 2021- On Thursday 28 October, RTS will be participating in the 1st Meeting of the Partners and Participating Entities of the Madrid World Capital of Construction, Engineering and Architecture Association ([MWCC](#)). The project, promoted by the Madrid City Council, currently has more than 130 public and private participating entities and is based on the idea of making the city the global capital for construction.

During the meeting, which will be officially and institutionally inaugurated by the Madrid City Council and the Chairman of the MWCC, David García Núñez, there will be presentations to show the different projects that have already been executed to date along with future planned projects.

During the year and a half that has elapsed since the Association was first established, all the entities that are part of the MWCC have been able to create a real ecosystem of entities linked to the infrastructure, engineering and architecture sectors.

[RTS International Loss Adjusters'](#) participation represents the first collaborative relationship with a corporate group dedicated to insurance loss adjustments, thus expanding the project's scope.

About RTS International Loss Adjusters

We are an international corporate group founded in 1989, with own offices in Spain Latin America and Portugal. From the start, our business has been appraisal or adjustment of industrial losses and damage and technical branches of all types.
